

# EYELASH EXTENSIONS

The Wellness Spa now offers safe and customized eyelash extensions. We provide Classic, Royal and Volume lash extensions, using only premium synthetic material that is curled to imitate a natural lash. Our eyelash extensions provide a rich-looking appearance that eliminates the need for mascara, offering you a low-maintenance beautiful look.

Full Set Lash Extensions (with under eye treatment) Full set should last 6-8 weeks with proper care.	90-120 min.	\$250
Lash Refill (with under eye treatment) 7-30 days after initial application *Note: If past 30 days, \$100+ (refill cost will depend on amount of lashes needed and time required).	30-60 min.	\$45-75
Removal (full set)	30 min.	\$30

## Lash Extension FAQ's

### WHAT ARE SEMI-PERMANENT EYELASH EXTENSIONS?

They are individual extensions made of a synthetic material to look like perfect natural eyelashes; thicker at the base and thinner at the tip with a slight curl. They are adhered one by one to a natural lash with a medical-grade bonding adhesive giving the appearance of a darker, more voluptuous lash-line.

### HOW LONG DO SEMI-PERMANENT EYELASH EXTENSIONS LAST?

An average eyelid has approximately 100 natural hairs which shed at an average rate of 20-30% every 2 weeks. Therefore, when the natural hair sheds, so does the extension that was attached to it. Since new hairs are always growing in, refills can be performed to attach extensions to the new growth keeping the lashes looking full continuously or for as long as you wish to maintain them.

### HOW OFTEN WILL I NEED TO GET A REFILL?

On average, refills are recommended every 2-4 weeks to keep the lashes looking their best. With proper maintenance semi-permanent eyelash extensions can be kept up indefinitely through regular refills.

### WILL THE EYELASH EXTENSIONS DAMAGE MY NATURAL HAIRS?

With our application process and the quality of our made-in-the-USA product used, the extensions will not damage your natural lashes. It is imperative to the health of your lashes to have each natural hair isolated when an extension is adhered to it and ensure proper separation so that the hairs can continue to grow and shed as they would naturally. We only use formaldehyde-free, medical-grade adhesives which are made exclusively for lash extensions. This combination of our top quality adhesive and individual lash attachment will sustain the health and integrity of the natural hairs indefinitely.

### WHAT DO THE LASH EXTENSIONS LOOK LIKE AND HOW DO THEY FEEL?

Our eyelash extensions look and feel completely real as each application is customized to your eye shape, natural lash line, and desired look. We offer different curls, thicknesses, and lengths that are indistinguishable in weight to human lashes thereby providing a weightless feel to your lash line. Our professional lash stylist will choose a variety of extensions to create the most flattering, natural, and beautiful look for you.

## WHAT IS THE APPLICATION PROCESS?

The application process is very relaxing, just like receiving a spa service. You will lie back on a comfortable reclining chair and have your eyes closed the entire time. The application is very gentle and can be best described as though someone is gently brushing through your lashes. The service generally takes between 90 to 120 minutes to apply a full set and refills can be done in as little as 30 to 60 minutes.

## WHAT IS THE DIFFERENCE BETWEEN CLASSIC, ROYAL AND VOLUME EYELASH EXTENSIONS?

Classic Lash extensions are the most common lash application requested, where the attachment of 1 extension is applied to 1 natural eyelash which gives a very natural and realistic look. Royal Lash extensions offer the same ratio of 1 extension to 1 natural lash but with adhere longer, giving you more time in between refills. Volume Lash extensions are our premium application where we apply 2-3 lash extensions to 1 natural eyelash for a more glamorous, feathered look.

## HOW DO I TAKE CARE OF THESE LASHES ONCE THEY'RE ON?

It can take up to 8 hours for the eyelash extension adhesive to fully cure the bond between your natural lash and the extensions. Avoid swimming, spas, saunas and tanning on the day of your lash appointment. After the 8 hours, they are able to get wet. While sleeping, lashes can tangle or flip to the side. Brush through your lashes each morning with a clean mascara wand to reshape the extension and keep them fluffed into place. The overall upkeep is very minimal and very easy to manage.

## WHAT SHOULD I DO PRIOR TO MY APPOINTMENT?

Remove all eye makeup and clean your natural lashes with an oil-free cleanser.

If you wear contact lens, we recommend removing them.

Avoid caffeine and any other stimulants that may cause your eyes to flutter involuntarily.

Refrain from curling or perming your natural lashes prior to receiving your full set.

## CAN I HAVE MY EYELASH EXTENSIONS REMOVED?

Eyelash extensions can be easily removed using a special gel remover formulated to quickly dissolve the medical-grade adhesive and gently wipe away the lash extensions. The process is painless and will not harm your natural hairs – taking less than 30 minutes. Please do not attempt to remove lash extensions yourself as this can cause damage or loss of your natural lashes.

## AFTER CARE:

- Do not get your eyelashes wet for the first two hours.
- Do not use a spa, sauna or pool for the first 24 hours. The extensions need that amount of time to properly bond.
- Avoid pulling or rubbing your eyes.
- Do not use eyelash curlers with your extensions. With proper application you will not need them.
- ONLY use oil-free makeup remover.
- Proper hygiene is very important. Please keep lashes clean by regular washing.
- Use only mascaras that are safe for eyelash extensions, no oil-based or waterproof mascaras. Only apply the mascara to the tips of your lashes.
- After showering avoid rubbing lashes, it best to blot them with a towel and let them air dry.
- You can also dry the lashes by using a hair dryer on the cool setting and blowing them dry from the bottom up. It makes them curlier and fluffy.
- Use care when applying facial and eye creams to avoid the lash line. Too many oil-based products can break down the adhesive.
- Book touch-up appointments every two to four weeks to maintain your new eyelash extensions.
